SUMMARY

Results-driven Java Developer with experience in designing, developing, and maintaining enterprise applications using Java, Spring Boot, Spring Cloud (Microservices), and Hibernate. Skilled in building RESTful APIs, implementing unit testing with JUnit, and managing relational databases using MySQL.

Experienced in leveraging the Unqork low-code/no-code platform to develop business applications and automate workflows. Certified as an Unqork Creator, demonstrating expertise in application configuration, integration, and platform best practices. Strong understanding of the Software Development Life Cycle (SDLC), Agile methodologies, and delivering scalable, high-quality software solutions.

EXPERIENCE

Internship

XOR Bit Infotech Pvt Ltd

January 2022 - March 2022, Pune, Maharashtra

- Developed a **Smart Irrigation System** for automated water pump control using **IoT** and **GSM** technology.
- Designed and implemented a water level monitoring and control system to minimize water wastage caused by overflowing water tanks.
- Built the solution using **Arduino** as the IoT platform, integrating **GSM** and water level sensors for real-time monitoring and control.
- Enabled remote monitoring and manual pump control through **SMS** using a GSM module, allowing users to operate the system from anywhere.
- Gained hands-on experience in **embedded systems, IoT application development**, sensor integration, and hardware-software communication.

Software Engineer

LTIMindtree

June 2024 - June 2026, Pune, Maharashtra

- Developed and maintained enterprise-grade Java applications using Spring Boot, Spring Framework, and Hibernate to deliver scalable and efficient business solutions.
- Designed, developed, and implemented RESTful APIs and microservices using Spring Cloud architecture, enabling seamless integration between distributed systems.
- Performed unit testing and code validation using JUnit to ensure application reliability, maintainability, and high code quality.
- Managed and optimized relational databases using MySQL, including query development, schema design, and performance tuning.
- Utilized the Unqork low-code/no-code platform to design and configure business applications, workflows, and integrations, accelerating solution delivery while reducing development effort.
- Earned **Unqork Creator Certification**, demonstrating proficiency in application development, workflow automation, and platform best practices.
- Collaborated with cross-functional teams throughout the software development lifecycle, including requirement analysis, development, testing, and deployment.
- Participated in debugging, troubleshooting, and enhancing existing applications to improve performance and user experience.
- Followed Agile development methodologies and contributed to code reviews, documentation, and continuous improvement initiatives.

EDUCATION

10th

Hansraj Public School • Panchkula, Haryana • 2017

12th

Govt Model SR SEC School • Chandigarh • 2019

Bachelor in Computer Science

Dr. D.Y. Patil Institute of Technology • Pune, Maharashtra • 2023

SKILLS

Java Development
Spring Framework
Web Development
Rest API Design
Unqork

PROJECT

Pro Tech-Suite

LTIMindtree • June 2023 – August 2023

- Worked on the **Protech Suite**, a web-based application designed to streamline project management processes within an organization.
 - Developed and maintained **REST APIs** using **Java** and **Spring Boot** based on business requirements.
 - Contributed to features such as project proposal submission, project creation, task assignment, user role management, and project status tracking.
 - Participated in **requirement gathering**, code analysis, and client interactions to ensure successful implementation of project requirements.
 - Collaborated with cross-functional teams to deliver high-quality solutions and improve overall project efficiency.
 - Led the development team for the project by coordinating tasks, providing technical guidance, and ensuring timely delivery of project milestones.
 - Actively participated in knowledge-sharing sessions, contributing to the team's understanding of the technologies and best practices used in the project.
 - Helped enhance collaboration, communication, and productivity by developing scalable and efficient backend solutions.
-

CERTIFICATIONS

Certified Unqork Creator

Unqork • 2026

- The earner of this certification has successfully completed the Unqork Creator Assessment. The earner demonstrated proficient knowledge of building Unqork applications and is considered a project-ready Creator.
